

MUSEUM OF OXFORD

Make a lace patterned lantern

You will need: jam jar, doily or paper cut out (see separate instructions), glue stick, scissors and battery light (e.g tea light or bike light)

STEP 1: If using a paper doily then cut out the centre and divide the edge into sections to make it easier wrap around the jar

STEP 2: Glue each section on without too much of an overlap

STEP 3: Finish by folding over the paper over the rim to create a neat effect. You could also tie a ribbon around the rim to add colour.

Put it by your window or front door!
